📍 Hyderabad

CAREER OBJECTIVE

Motivated Computer Science graduate with strong skills in Python, SQL, and data analysis. Experienced in KYC verification, loan processing, and financial data handling. Seeking an entry-level role to apply analytical and technical skills while contributing to organizational success.

EDUCATION

- B.Tech (Computer Science & Engineering)
JNTU Anantapur, 2025 – 80%
- Intermediate (MPC)
BIE, 2021 – 74%
- SSC
BSE, 2019 – 83%

WORK EXPERIENCE

Associate Operator (Finance & Data Operations)

JSW Sakthi Foundation – 7 Months

- Conducted PAN India bank account verification to support loan processing
- Analyzed overdue and past-due accounts for eligibility assessment
- Performed KYC verification and document validation as per compliance standards
- Supported loan approval and disbursement processes
- Maintained accurate customer and financial data records
- Improved data accuracy through systematic verification and validation

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Web:** HTML, CSS, JavaScript
- **Tools:** Excel, Git
- **Core Area:** Data Analysis, KYC Verification, Loan Processing

Projects

Student Attendance Management System:

- Developed a web-based system to manage and track attendance
- Implemented login authentication and report generation
- Tech: Python, Flask, SQL

Text-to-Speech Web Application:

- Built an application to convert text into real-time speech
- Tech: HTML, CSS, JavaScript

Fuzzy k-Means Clustering in MANET:

- Developed clustering algorithm using fuzzy logic techniques
 - Improved network performance and efficiency
 - Implemented using Python, NumPy
 - Enhanced data grouping accuracy in dynamic networks
-

Internships

- **Data Analysis Intern – CognifyzTechnologies :** Worked on Python-based data analysis and extracted insights from datasets. Analyzed restaurant/hotel data to track customer count and business trends.
Created reports for daily and monthly customer insights.
Used Python / Excel / SQL.
 - **Web Development Intern – Bharat Intern:** Developed basic websites and learned web development concepts
 - **Python & AI Trainee – Techno Hacks:** Learned Python programming and basics of Artificial Intelligence
-

Certifications

- NPTEL Certification in Cloud Computing
 - Python Development & Problem-Solving Certification
 - Web Development Certification
 - Code Debugging Certification
 - Data Analyst Internship Certification – Cognifyz Technologies
-

Soft Skills

- Communication Skills – Able to explain ideas clearly
 - Adaptability – Quick to learn new technologies
 - Teamwork – Works well in team environments
 - Analytical Thinking – Ability to analyze data and situations
-

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge.
